GENERAL INPORMATION:
APPLICANT: Qvist, Per
Bonde, Martin
TITLE OF INVENTION: A Method for Assaying Collagen Fragments
Method and Use of the Method to Disgnose Method and Use of the Method to Disgnose Disorders Associated with the Metabolism
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Length 1341;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 117;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Indels
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Version #1.25
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 DB 14;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Query Match

```
A; Molecule type: protein
A; Residues: 1037-1042 < EDRs
A; Residues: 1037-1042 < EDRs
A; Residues: 1037-1042 above correspond to the carboxyl end of the protein
A; Note: residues 1037-1042 above correspond to the carboxyl end of the protein some C; Comment: Lysines at positions 103, 700, 934, and 946 above may be hydroxylated in some C; Comment: Most of the profilines at the third position of the tripeptide repeating unit (C; Comment: Pro-1002 is the only 3-hydroxyproline and the only hydroxylated proline in poc; Superfamily: collagen alpha 1(1) chain; fibrillar collagen carboxyl-terminal homology; C; Keywords: coiled coil; extracellular matrix; glycoprotein; pyroglutamic acid; trimer; F;1/Modified site: pyrrolidone carboxylic acid (Gln) #status experimental
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   10;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       475

A;Title: Expression of two nonallelic type II procollagen genes during Xenopus laevis
     bovine
C,Comment: The order of the eight CNBr peptides in the alpha 1(I) chain of boving 9, 149, 268, and 217 residues.
C,Comment: The complete chain contains 1052 residues.
C;Superfamily: collagen alpha 1(I) chain; fibrillar collagen carboxyl-terminal ht C;Keywords: coiled coil; extracellular matrix; glycoprotein; pyroglutamic acid; F;1/Modified site: pyrrolidone carboxylic acid (Gln) #status experimental
                                                                                                                                                                                                                                                                             148
                                                                                                                                                                                                                                                                                                                                          208

A; Residues: 87-106;1017-1029;1037-1049 < HEN>

A; Residues: 87-106;1017-1029;1037-1049 < HEN>
C; Comment: Prolines at the third position of the tripeptide repeating unit (G-X-Y) are h
C; Comment: The type III collagen molecule is a trimer of identical chains, linked to eac
C; Comment: The type III collagen molecule is a trimer of identical chains, linked to eac
C; Comment: The type III collagen molecule is a trimer of identical chains, linked to eac
C; Comment: The type III collagen molecule is a trimer of identical chains, linked to eac

"Two mRNAs of mouse pro alpha 1(1) collagen gene differ in the size of the 3'-untranslated region.";
Mucleic Acids Res. 16:773-773(1988).
-! FUNCTION: Type I collagen is a member of group I collagen
(fibrillar forming collagen).
-! SUBULIT: Triners of one alpha 2(1) and two alpha 1(1) chains.
-! TISSUE SPECIFICITY: Forms the fibrils of tendon, ligaments and bones. In bones the fibrils are mineralized with calcium
                                                                                                                                                                                                                                                                                                                                                                  MEDLINE=86137403; PubMed=3841523;
